## Parma

*Capitale Italiana  
della Cultura  
2020*

**Parma 2020, Italian  
Capital of Culture**  
is a programme by  
**The City of Parma**

Supported and implemented  
with the contribution of  
**Ministry for cultural  
heritage and tourism**  
**Emilia Romagna Region**  
**Municipality of Parma**  
**Cariparma Foundation**  
**Committee for Parma 2020**  
and in partnership with  
**Province of Parma**  
**University of Parma**  
**Diocese of Parma**  
**Emilia Destination**

with the active participation  
of the local public  
and private system

The Mayor of Parma  
**Federico Pizzarotti**

The Council  
**Michele Alinovi, Tiziana  
Benassi, Marco Bosi,  
Cristiano Casa, Marco  
Ferretti, Michele Guerra,  
Nicoletta Paci, Laura Rossi**

General Manager  
**Marco Giorgi**

Parma 2020 Strategic Direction  
**Michele Guerra, Councillor  
for culture and youth policies  
of the Municipality of Parma**

Technical-administrative  
Direction  
**Flora Raffa, Manager of the  
Departement for Culture, Youth  
and Strategic development  
of the Municipality of Parma**  
**Mariella Zanni, Manager of  
Casa della Musica Department  
of the Municipality of Parma**

Operational Implementation  
**Francesca Brugnoli,**  
Responsible for Youth and  
creative industries; **Cristina  
Calidoni,** Responsible for  
exhibition events and activities;  
**Mascia Pelosi,** Responsible  
for Tourism; **Silvana Randazzo,**  
Responsible for the Museum  
System; **Manuela Calderini,**  
**Annalisa Fiorani, Luca  
Amadasi, Clara Armani,  
Francesco Bacchini, Matteo  
Barbacini, Carlotta Beghi,  
Eleonora Benassi, Cesare  
Bertozzi, Federica Biancheri,  
Danila Bigi, Alessandra Bolis,

Regazzi, Maria Cristina  
Robuschi, Marcello Rosselli,  
Vanni Sacchetti, Marco  
Sassi, Francesca Spagnolo,  
Solange Telloli, Stephanie  
Tramacere, Giovanna Varini,  
Alessandro Zuccherò**

Chairman of the Committee  
for Parma 2020  
**Federico Pizzarotti**

Vice chairman  
**Paolo Alinovi**

Managing Directors  
**Marco Alessandrini, Luigi  
Amore, Corrado Beldi,  
Isabella Benecchi, Roberto  
Confalonieri, Vittorio  
Dall'Aglia, Carla Dini,  
Augusto Schianchi**

Director  
**Ezio Zani**

Projects and cultural  
strategies coordinator  
**Francesca Velani,**  
Vice President of Promo  
PA Foundation

Communication strategies  
**Amedeo Palazzi, AD Fachiro**

Business relations  
**Giovanna Usvardi,**  
**Secretary general**  
**Giovanni Pellegrini,** Association  
of Entrepreneurs of Parma

Organisational secretariat  
**Mauro Rizza,** Responsabile  
**Francesca Monaco**  
**Francesca Pizzo**

Auditor  
**Luca Laurini**

We thank all the Departments  
of the Municipality that  
every day contribute  
to the implementation  
of the Programme

## BOOK

Edited by  
**Antonio Somaini**  
and **Marie Rebecchi**

Texts  
**Emmanuel Alloa**  
**Jacques Aumont**  
**Raymond Bellour**  
**Christa Blümlinger**  
**Grégory Chatonsky**  
**Georges Didi-Huberman**  
**Philippe Dubois**

## TABLE OF CONTENTS

16	<b>Introduction</b> Antonio Somaini, Michele Guerra, Éline Grignard, Marie Rebecchi
19	<b>From Time Machines To Machine Visions</b> Antonio Somaini
43	1/ TIME MACHINES
53	<b>Spaced-Out Time. On Time Axis Manipulation</b> Emmanuel Alloa
71	2/ TIME AXIS MANIPULATIONS
83	<b>The Dance of All Things</b> Georges Didi-Huberman
103	3/ FLOWS
115	<b>The Waves</b> Raymond Bellour
121	4/ INSTANTS
133	<b>The Flux-Image</b> Philippe Dubois
153	5/ TIME-LAPSE
163	<b>The Master of Time: Jean Epstein's Nonhuman Time Axis Manipulation</b> Noam M. Elcott
185	6/ MULTIPLE EXPOSURES
197	<b>Time-Lapse Machine. Plants, Crystals and Clouds: The Kaleidoscope of Time</b> Marie Rebecchi
211	7/ ANIMATE, INANIMATE
221	<b>Temporal Vertigo of The Archive</b> Christa Blümlinger
235	8/ RE-MONTAGE
247	<b>Time Looped Back</b> Jacques Aumont
263	9/ LOOPS & REVERSALS
277	<b>Time Crystals (Film, Deep Time and Geological Strata)</b> Éline Grignard
295	10/ DEEP TIME
307	<b>Book of Machines (excerpts)</b> Grégory Chatonsky
317	11/ MACHINE VISIONS

# FROM TIME MACHINES TO MACHINE VISIONS

Antonio Somaini

"Acceleration, Slow Motion, and Time" [*Zeitraffer, Zeitlupe und der Raum*] (1928), Ernst Bloch highlighted the "distancing effect" of both techniques,<sup>69</sup> while Walter Benjamin, in *Little History of Photography* (1931) and *The Work of Art in the Age of Its Technological Reproducibility* (1935-36, five versions) saw in them an example of the techniques through which cinema and photography could reveal an "optical unconscious."<sup>70</sup> Presenting cinema as a "machine for contemplating time," Jean Epstein writes in *L'Intelligence d'une machine* (1946) that cinema is a "machine that stretches or condenses duration, that demonstrates the variable nature of time, that preaches the relativity of all measurements."<sup>71</sup>

During the 1960s, 1970s and 1980s we again find the technique of time-lapse in films that highlight once more the acceleration of life in the modern metropolis, be it in order to focus on its "organic" dimension, as in Hilary Harris's *Organism* (1975), or on the alienating effects of ubiquitous technology that imposes its rhythms on all areas of human life, as in Godfrey Reggio's *Koyaanisqatsi* (1982). In recent years, this technique continues to proliferate, with its uses ranging from the celebration of efficiency in time-lapse images of construction sites, to the anguishing denunciation of the devastating effects of global warming in images of glaciers receding Fig. 15 → Time-lapse photography of glaciers receding, to poetic reconstructions of the biological processes in films such as Terence Malick's *The Tree of Life* (2011) or *Voyage in Time* (2016).

## 8. "ENTERING INTO THE FUTURE BY SLIPPING INTO THE CRACKS BETWEEN SECONDS"

During the 1920s and 1930s, time-lapse acceleration was often cited as an example of how a technically enhanced vision was capable of redrawing the limits between the visible and the invisible, allowing human eyes to see phenomena unfolding in time at a speed that lay beyond the thresholds of sensory perception. At the same time, seeing through the objective of the camera was also considered to be a way of perceiving the world from an unsettling, decentered, non-human point of view: a "non-human eye, without memory, without thought" (Jean Epstein),<sup>72</sup> an "impartial vision" disconnected from the biases of the human brain (László Moholy-Nagy),<sup>73</sup> a "kino-eye [...] more perfect than the human eye" (Dziga Vertov) Fig. 16 → Dziga Vertov, *Man with the Movie Camera*, (1929),<sup>74</sup> an "unfeeling camera" (Siegfried Kracauer).<sup>75</sup>

In recent years, this idea of a "machine vision" enhancing human vision beyond its limits—to the point of producing "invisible images" that human eyes cannot see, machine-

- 76 On this, see Trevor Paglen, "Invisible Images (Your Pictures Are Looking At You)," *The New Inquiry*, December 8, 2016, available online at <https://thenewinquiry.com/invisible-images-your-pictures-are-looking-at-you/>.

readable images that circulate across machine-to-machine networks with humans out of the loop **76**—has been at the center of a series of works by artists such as Jacques Perconte, Hito Steyerl, Pierre Huyghe and Grégory Chatonsky that reinterpret in new ways, through the possibilities of computer programming and artificial intelligence, the old connection between moving images, time manipulation and time travel.

Through a sophisticated use of programming that aims to unsettle and deconstruct standard compression formats in order to liberate all sorts of digital artifacts, Jacques Perconte has been developing for several years an attempt to reinterpret through digital means a textural perception of the layers of natural elements and atmospheres that can be found in British romantic paintings (Turner in particular) and in French impressionism. **77** His *Le Tempestaire* (2020) further develops this line of work through a direct dialogue with the homonymous film by Jean Epstein (1947). In the famous sequence in which the “storm tamer” calms the storm through the occult powers of a crystal sphere, Epstein manipulates the tempoal flow of the waves and the clouds through a series of techniques of time manipulation which include slow motion, freeze-frame, acceleration and reverse motion, while in the soundtrack we hear the eerie sound of the Ondes Martenot, an early instrument of electronic music that produces Theremin-like sounds **Fig. 17** → Maurice Martenot playing the *Ondes Martenot*. During the early 1920s, Theremin music was called in German *Ätherwellenmusik*, “music of the ether waves,” that is, music produced by a technical medium capable of capturing and modulating waves circulating across the atmosphere. What we see in Epstein’s *Le Tempestaire* is a similar, *environmental-atmospheric* use of the cinematic medium, which is here staged in its capacity to act upon the environment, modulating the energies carried by wind, water and vapor. Taking as a starting point a series of video images shot in the middle of a storm, Perconte produces a *generative video* in which a specially prepared software incessantly manipulates the initial video images producing different kinds of destructured, pixelated textures **Fig. 18** → Jacques Perconte, *Tempestaire* (2020). As he explains the work, “at each new edit the change of shot, instead of interrupting the image flow to usher in a new image, further develops the existing image through the arrival of a new one. In this way, the new shot carries within it the image that was already there: the colors melt into each other, and the materials mix to become what the technical possibilities allow as a function of the lumino-spatio-temporal complexity of the old and the new image. The image does not pre-exist *per se*, in the form in which it will be shown. Its visibility, its display, is an actualization.” **78**

77 For an overview of Jacques Perconte’s work, see <http://www.jacquesperconte.com>.
